Abstract

© 2016 Taylor & Francis Group, London. Technical and technological modernization of the industrial structure and infrastructure is an important condition for the development of the Russian economy. This review includes an analysis of the problems and the development of modern industrial production in the Russian economy. Data are provided on the Republic of Tatarstan and other regions with high production, economic, and innovative potential. Thus, reviewing the experience of innovative system implementation through industrial development in Russia is of interest.
